## Master of Science in Nursing

# Nurse Anesthesia MSN

Providing anesthesia care for  
patients across the lifespan

The Frances Payne Bolton School of Nursing (FPB) offers a diverse selection of exciting MSN majors and subspecialties. Choose one or make yourself even more marketable by designing your own program.

## Practicing in All Anesthesia Settings

Nurse anesthetists are advanced practice nurses who administer all types of anesthetic for every kind of surgery or procedure. As expert clinicians primarily responsible for direct patient care, they focus on preoperative evaluation, intraoperative management, and postoperative anesthesia care.

## Expert-Guided Clinical Courses

FPB offers clinical experiences in nurse anesthesia to students that allow them to give direct patient care, take part in staff education programs, and identify clinical research topics. Working closely with clinical experts, they help provide general and regional anesthesia in persons of all ages and participate in management of emergency operations, obstetrics, pediatrics, and neurosurgery.

## Rigorous Course Schedule

The nurse anesthetist major, as part of FPB's MSN program, requires approximately 40 hours of coursework, plus hundreds of hours of clinicals. Graduates are eligible for the certification exam conducted by the National Board of Certification & Recertification of Nurse Anesthetists (NBCRNA).

Post-master's certificates can be provided, based on individual needs and background education.
